

Unbreakable

Accept

With a surge of energy
You can feel the power rise
Every heartbeat starts to race
And the masses come alive

From the opening power chord, the blinding of the lights
Pure electricity, as the volume cracks the night
We pull together as one united force
Stand up collectively, with no remorse

Solid metal soldiers, driven by guitars
In a sea of gleaming eyes, bright as shooting stars

We're unbreakable
Together we're unbreakable
Unbreakable
Our spirit is unbreakable
There'll be no surrender
Straight into the fire

Different lives and stories, together in one song
We raise hands and fists high into the night
Voices in victory, reaching for the heights

Raging into the pit, with a tribal yell
We bend but never break, raising holy hell

We're unbreakable
Together we're unbreakable
Unbreakable
Our spirit is unbreakable
There'll be no surrender
Straight into the fire

Bonded and branded, rocked unto the core
This is our destiny, coming back for more

Yeah
Let me hear you scream

Unbreakable
Together we're unbreakable
Unbreakable
Our spirit is unbreakable
