

When I Was Cursed

Acceptance

I was lost before I found
The danger in love, the danger in love
Lost my breath to the ground
But the danger in love, the danger in love

Keeps me hanging on
Hanging on, hanging on

Feels like I've got nothing to lose something, lose something
Holding forever, will I lose something, lose something?
Shake all the weather from my face something, face something
Hold you forever, will I lose something, lose something?

I was cursed, where would I go?
With fear in my head, and a chill in my soul
Lost, now I can see
The danger in love, she's all that I need

She keeps me hanging on
She keeps me hanging on

Feels like I've got nothing to lose something, lose something
Holding forever, will I lose something, lose something?
Shake all the weather from my face something, face something
Hold you forever, will I lose something, lose something?

Keeps me hanging on
Ooh, keeps me hanging on
Keeps me hanging on

Feels like I've got nothing to lose something, lose something
Holding forever, will I lose something, lose something?
Shake all the weather from my face something, face something
Hold you forever, will I lose something, lose something?
