

# Make Sure It Hurts

ACCVSED

One day I will  
Have it figured out  
To cure this disease  
Need more than drugs in my system  
Help me find some sleep  
Will I believe what I am told  
To see what's good for me  
Make sure it hurts  
Make sure it hurts

To feel the rain on my face  
Maybe that's all that I need  
To let the wind carry me  
Back to the place we would meet  
Where I believed what you said  
You know what's good for me  
I know it hurts  
Make sure it hurts

Wish that I could follow you down  
The noise will try and drown me out  
Can't keep your sickness out of my system  
Don't turn around, you have to swallow it now

You killed my innocence  
Breathe in, breathe out  
Hanging in vertigo  
Pick a point, try to focus  
Embracing the fall always chokes me  
Breathe in, slow down  
Try to gather my thoughts before  
They're starting to crawl

Wish that I could follow you down  
The noise will try and drown me out  
Can't keep your sickness out of my system  
Don't turn around, you have to swallow it now  
You killed my innocence

Back where we started from  
Back where we started from  
What's been tied will come undone  
Back where we started from

Don't turn around

One day I will  
Have it figured out  
To cure this disease  
Need more than drugs in my system  
Help me find some sleep  
Will I believe what I am told  
To see what's good for me  
Make sure it hurts  
Make sure it hurts

Wish that I could follow you down

The noise will try and drown me out  
Can't keep your sickness out of my system  
Don't turn around, you have to swallow it now  
Swallow it now  
You killed my innocence  
I still can't keep your sickness out of my system  
Don't turn around, you have to swallow it now
