Middle finger, no remorse (Umph!)

Life can take you off the course (Woo!)
Just to bring you back aboard (Woo!)

In the G in San [?] (Woo!)
Purpose driven, can't ignore it (Woo!)

Pandemic shiftin' minds

They want the people to panic
They want our people to vanish
Come in this bitch like I'm ready to die but I'm ready to live, I done loaded the cannon
I can't imagine if this nigga Trump get elected again, he gon' really do damage
We in the sensitive place in the planet
I know my rich niggas up for commandments
Really don't gotta, we all been effected
Our family too precious, sustaining the message

Man, bruh came in with that stimulus check though!
What y'all want be to do?

We gotta pay attention to the lesson
Most of people stressin', most of them regret it
I ain't apologetic when we voted for 'em, wasn't thinking you would be indebted
Now we're paying, damn it
People starting to vanish
Way too much confusion, can not understand it
I've been at the crib feeling kinda manic
Meditating deep and trying to take advantage
Just the-just the moment who can I become?
Think it's superhuman when you feeling like the one
Gotta bond together, play the same drums
Self-preservation, we can see the sun
Gotta stay sane, gotta stay sane
Gotta stay sane!
Speaking life, tell me, uh
