

Feel Anything

Acres

Lie through your teeth
And tell me how you love the way I
Feel on your skin
And I'm all that you still need
Breathe me in
Wear me down and suffocate me
Sink your teeth right into me

Can you feel it
Feel anything at all
Can you hear it
It's buried in the walls
And every word you ever said
Your voice is trapped inside my head
Can you feel it like I do

And I know that nothing's gonna
Change the way I ache, I'm leaving
It's more than I can take
Think about the choice you made
And everything you threw away
Sink your teeth right into me

Can you feel it
Feel anything at all
Can you hear it
It's buried in the walls
And every word you ever said
Your voice is trapped inside my head
Can you feel it like I do

Pulling me under you bury me deep
Inside this world you made for me

Made for me
You bury me deep
Think about the choice you made
And everything you threw away

Can you feel it
Feel anything at all
Can you hear it
It's buried in the walls
And every word you ever said
Your voice is trapped inside my head
Can you feel it like I do
