

Aftermath

Ad Infinitum

Fall, you're coming with me

If I fall, you're coming with me
If I fall, you're coming with me

Creeping under my skin
I step into the light, you're coming undone
Outside, looking in
Does it feel like a back seat ride all alone?

Silent screams, oh
Deep, deep inside you just know, know

You can make me spin
You can make me crash and burn
But if I die you're coming with me
You can make me spin
You can make me crash and burn
But if I die you're coming with me

You think you figured me out
That you can pull all my strings and I'll never know
Walking over my spine
Does it feel like you can't break free, let it go?

You can make me spin
You can make me crash and burn
But if I die you're coming with me
You can make me spin
You can make me crash and burn
But if I die you're coming with me

You can make me spin
You can make me crash and burn
But if I die you're coming with me
But if you drag me under
You can make me spin
You can make me crash and burn
But if I die you're coming with me
