

The One You'll Hold On To

Ad Infinitum

You look at me and you say that I seem a little stressed out
You can read my moves and my mind
It's just you and me, we want it

I've been deceived but you know that I want to let my guard down
From the twilight 'til the sunrise
I'm letting you in, I'm letting you in

I give my body and my heart to you
Don't let me down
I'll be the one you'll hold on to
Who'll love you right
Show me a new destination
We gravitate, it's a new sensation
I give my body and my heart to you
I know you want it too

You make me feel like I'm floating and everything is alright
And I'm falling into your arms
It's just you and me, I need it

I give my body and my heart to you
Don't let me down
I'll be the one you'll hold on to
Who'll love you right
Show me a new destination
We gravitate, it's a new sensation
I give my body and my heart to you
I know you want it too

I give my body and my heart to you
Don't let me down
I'll be the one you'll hold on to
Who'll love you right
Show me a new destination
We gravitate, it's a new sensation
I give my body and my heart to you
I know you want it too
