

Darkness Machine

Adagio

I am the mighty death machine men has created
The subhuman clone that you will bow before
Evil 2.0 secretly generated
Technological death intelligence

Nox machina servus
Gloria Noctem belli

Holographic disturbance taking hold of the media
Chaos allegory black divinity
The sound of machineguns spitting fire throughout the city
Mecha wartanks stalk and terminate

Darkness
Is falling over
The era of the machines
Is now upon us

Anti matter drones circling high up in the sky
Lurking cyborgs checking identity
The rise of the machine finally realized
Cryogenic state awaits humanity

Darkness
Is falling over
The era of the machines
Is now upon us
