

Neon Fools

Adam Doleac

If I was smart, I would walk out the back door
I wouldn't say, "Hey, I'll buy you the drink that you came for"
And if you know I was good for you
You wouldn't look at me like that
And we wouldn't be leaning in and falling in so fast
But we are and it's already gone this far

Let's let the neon fool us in to thinking
Me and you ain't gonna burn out
Give in to this thing and feel it
Underneath these lights right now
We know better than to leave here together
But, baby, what do we got to lose?
Let's be neon fools and let that neon fool me and you tonight

Let's act like we don't know what's gonna happen
And blame it on the drinks
Call it a chemical reaction
Girl, the way that you looking right now
Lights shining down on you
I can't see any reason not to

Just let the neon fool us in to thinking
Me and you ain't gonna burn out
Give in to this thing and feel it
Underneath these lights right now
We know better than to leave here together
But, baby, what do we got to lose?
Let's be neon fools and let the neon fool me and you tonight

Neon fool me and you tonight
We can worry about tomorrow, tomorrow
And we both know where this night's gonna go

Let's let the neon fool us into thinking
Me and you ain't gonna burn out
Give in to this thing and feeling
Underneath these lights right now
We know better than to leave here together
So, baby, what do we got to lose?
Let's be neon fools and let the neon fool me and you tonight

Let the neon fool me and you tonight
Oh, neon fool
Oh, neon fools
