

## Where Country Music Comes From

Adam Doleac

It's late but I don't wanna take you home  
You say, "I don't care where we go"  
'Cause Amarillo by Morning's on the radio  
You smile, tell me baby, "Turn it loud"  
Catching half the words with the windows down  
I think I know what King George was singing 'bout

Guys like me, girls like you  
That's where country music comes from  
Stars like that, nights like these  
Turning real life into love songs  
That's where country music comes from

It's hard not to hear a melody in my head  
Every time you look at me  
There's so much magic in the little things  
Making my heart sing

'Cause guys like me and girls like you  
That's where country music comes from  
Stars like that, nights like these  
Turning real life into love songs  
That's where country music comes from

The midnight moon, a goodnight kiss  
The taste of whiskey on your lips  
It's more than three chords and the truth

It's guys like me, girls like you  
That's where country music comes from  
Stars like that, nights like these  
Turning real life into love songs  
That's where country music comes from  
That's where country music comes from
