

LUBE

Adam Lambert

Slip in the room
Slip right into you
Faded and loose
Trip to the moon
Lavender blue
Dripping on you

No we don't need no friction
We don't need to do it dry
Yeah we can keep it liquid
Slide your body into mine
Mine

Be a real good boy and lube it up
So you can move your body
Move your body like I do
Gonna make you nut
Every time I move your body
Move your body like I do

Move your body
Move your body like I do
Move your body
Move your body

Pick up the pace
Give and I take
Ridin' the wave
Show me how you roll
Give you control
How deep can we go

No we don't need no friction
We don't need to do it dry
Yeah we can keep it liquid
Slide your body into mine
Mine

Be a real good boy and lube it up
So you can move your body
Move your body like I do
Gonna make you nut
Every time I move your body
Move your body like I do

Move your body
Move your body like I do
Move your body
Move your body like I do

Move your body
Move your body
Move your body
Move your body
