

## 10,000 Miles

Adam Pascal

Wait for the sun to set your time  
Wait till your tide rolls out to sea  
Take a deep breath, whisper my name  
I'll look up just in time to see  
I'll see the sky that's in your eyes  
Then the stars can follow me  
10,000 miles to take me home  
I don't belong, out here alone at sea  
10,000 miles ain't that far  
When it's over and done,  
there's nothing but you and me  
Take all your blessings and your prayers  
Lay down your blanket on the beach  
Just watch the waves crash on the shore  
And feel the water at your feet  
and know that somewhere I am home  
I feel you from the ocean deep  
If from the farthest sun I'll carry on  
Just for the moment I can feel  
The beauty of the beating of your heart  
Every time it beats for me
