

Where You Are

Adam Saleh

Things were all good just a few months ago
Until I last got a text a few days ago
Saying that she can't do it all again
Since I left school things ain't been the same

Before I can tell the send I gotta tell the start
I know you been holding me down girl, you're my heart
The question is when I'm coming back
I see I think you know the answer to that

When I started rapping it was whatever
Now I'm really working just to make my life better
Problem is now her moods change like the weather
Trying to do whatever just to keep it all together

But when it rains and it pours
And I'm seeing all these issues that I can't even ignore
You mean the most by far so whenever you call
I will come to where you are

It was back in the day when I met her
I would do whatever to try and get her
And keep her under my wing, she liked the confidence that I bring
Like Lauryn Hill man she had that one thing

Favorite song that hit the radio, we both were just singing
Her friends used to say, man, that dude's a lame
But who's the one talking now?
'Cause I'm the one all her friends talk about

Ever since I got paid, finally got a new car
Nobody can apart what we've got
Off one plane hopping onto another
Times will come when it's hard to see each other

But when it rains and it pours
And I'm seeing all these issues that I can't even ignore
You mean the most by far so whenever you call
I will come to where you are
