

Looking For You

Addison Road

Look at me, your eyes so wide, I can see right through you like
a window. When your smile rises high, I'll know why. I'll know
why

All my life I've searched for somebody but I was looking for yo
u. All the time I was looking for love. You should know I was l
ooking for you. I was looking for you

Dark empty rooms I searched, my heart like a firefly looking fo
r another light to light the night. Light the night

All my life I've searched for something but I was looking for y
ou. All the time I was looking for love. You should know I was
looking for you. I was looking for you

I want you and all you are-bandaged, bruised, and scarred. When
your smile rises high, I'll know why. I'll know why

All my life I've searched for somebody but I was looking for yo
u. All the time I was looking for love. You should know I was l
ooking for you. I was looking for you

Look at me, your eyes so wide, I can see right through you like
a window. When your smile rises high, I'll know why. I'll know
why
