

# Time Stood Still

Adeline Hill

Take me back to that evening  
That first glance kind of feelin'  
When my world had started to turn upside down  
Take me back to that first dance  
The one that turned into a romance  
That I didn't think I'd have for quite a while

So I pushed and I pulled  
And I tried to ignore that feelin'  
But as soon as I looked at you there was no denyin'

Did you see the way the stars shine  
The night it all began?  
And did you think about us late that night and play it by beginnin'  
And did you wonder if those fairy tales really do exist?  
Cause I swear as soon as I saw your face  
It all made sense  
It's right where  
Yeah, yeah, yeah  
Time stood still

And before you said a single word  
I knew right from the start  
That even if I lost you, if you're worth the broken heart  
I don't remember what we said that night  
It all just felt so new  
And I didn't know where this would go  
But I knew you wondered too

So I pushed and I pulled  
And I tried to ignore that feelin'  
But as soon as I looked at you there was no denyin'

Did you see the way the stars shine  
The night it all began?  
And did you think about us late that night and play it by beginnin'  
And did you wonder if those fairy tales really do exist?  
Cause I swear as soon as I saw your face  
It all made sense  
It's right where  
Yeah, yeah, yeah  
Time stood still

And did you see the way the stars shine?  
Did you see the way the stars shine?  
Did you see the way the stars shine  
The night it all began?  
Did you think about us late that night and play it by beginnin'  
And did you wonder if those fairy tales really do exist?  
Cause I swear as soon as I saw your face  
It all made sense

Did you see the way the stars shine  
The night it all began?  
And did you think about us late that night and play it by beginnin'  
And did you wonder if those fairy tales really do exist?  
Cause I swear as soon as I saw your face

It all made sense  
It's right where  
Yeah, yeah, yeah  
Time stood still
