

Time Is A Destroyer

Adept

Time stands still for no man, close your eyes
Like a candle in the wind it flickers
Life can't seem to stand the test of time
Like a candle in the wind it flickers

It's like a fistful of sand when your time is running out
It's like an ocean tide that keeps draining your mind
It's like a fistful of sand when your time is running out
It's like an ocean tide that keeps draining your mind

Time stands still for no man, close your eyes
Like a candle in the wind it flickers
Life can't seem to stand the test of time
Like a candle in the wind it flickers

And the hardest part of life is that time is a destroyer
