Thunder in the sky over Broken Jawbone Canyon
There's nothing stealth about
The fight ahead
Flying right over you
Flying right over you
Flying right, flying right over you

Can't you smell American aggression?
Do you hear the sound of genocide
And exploitation?
Flying right over you
Flying right over you
Flying right, flying right over you

Do you fear foreign revolution?
Suicide missions, social evolution?
Flying right over you
Flying right over you
Flying right over
Flying right over
Flying right over you
Flying right over you
Flying right over
Flying right over
Flying right over you
