

# Cairo

Aeris Roves

I just wanna tell you what's been on my mind  
But every time I try and say love  
I stop myself and bite my tongue  
And tell myself I don't belong here, here  
They said it's so hard to find  
But it can't be that hard to come by  
If I see you every time I look up  
And get to thinkin' like

I just took a trip to the eye of the storm  
Hundred miles from all the commotion  
The sky is long, the nights are warm  
I've never felt like this before

'Till I see Cairo  
It didn't seem much 'till you came closer, closer  
And if this is final  
It could be us 'till it's all over  
Over, over

In my mind you've taken over  
And that's okay I suppose  
When we laid eyes one October  
I felt you taking a hold, hold

I just took a trip to the eye of the storm  
Now I'm miles from all the commotion  
The sky is long, the nights are warm  
I think we found our final form

And I see Cairo  
It didn't seem much 'till you came closer, closer  
And if this is final  
It could be us 'till it's all over  
Over, over

It could be us 'till it's all over  
Over, over  
Over, over  
Over, over  
It could be us 'till it's all over
