

Let Go

After Midnight Project

Chasing all the memories
of ever lasting nights
The moon and stars were the back drops
Of the rest of our lives

We jump and we would fall
We pull until they say let go

Growing up and finding out
That life is not a dream
Mom and dad werent perfect
And the world was never clean

Where do we all go
After the show
Let go
Let Go
Let go

Just Drive
Faster
And take me away from here
Ive grown tired of a place where I was born
Oh, oh, a place I used to know

Friends Ive watched fade away
Taking their lives slow
I remember who I was
But only try to look forward

Where did we get old

What do we have to show

Let go

Let go

Let go

But I dont know how

Just drive

Faster

And take me away from here

Ive grown tired of a place where I was born

oh oh

A place I used to know

Love come and rescue me from fear

Fear keeps on winning

And I wont look back

Those days are gone

And Im trying to let go

Why cant you

Why cant you

Why cant you

Just let go

Why cant you

Why cant you

Why cant you

Just let go

Why cant you

Why cant you

Why cant you

Just let go

Cause I dont know how

I wont let go
