

UTERUS & UNIVERSE

Agnes

I feel it, I feel it, I feel it all at once
Mind blowing, when it comes to life
Give me hope
I'm in it, I'm in it, I'm in it all now
Unfolding, every reason why
Hold up, is it real now?

I'm a part of a big creation
Building up from my own little nation
Building, building, building now
Building, building, building now

I'm a part of a big creation
Building up from my own little nation
Building, building, building now
Building, building, building now

I need it, I need it, I need it all now
Come hold me, 'cause I'm in doubt
Give me hope
Hold up, I can hear my truth
I been calling but I couldn't get through yet
It's uterus and universe and all that's in between now

I'm a part of a big creation
Building up from my own little nation
Building, building, building now
Building, building, building now

I'm a part of a big creation
Building up from my own little nation
Building, building, building now
Building, building, building now

Building, building, building now
Building, building, building now
It's uterus and universe and all that's in between now
Building, building, building now
Building, building, building now

It's uterus and universe and all that's in between now
It's uterus and universe and all that's in between now
It's uterus and universe and all that's in between now
It's uterus and universe and all that's in between now
