

# WAKE UP

Agnes

You and I are so much more than our history  
Wake up!

Wake up, honey, you're living in the past  
Repeating those old scenes like a mantra on crack  
Wake up, honey, it's time for us to see  
That you and I are so much more than our history  
Raise your standards, a panoramic view  
Perspective is always a key to your truth  
Winner, loser, both at the same time  
So why not have the glass-is-overflowing state of mind?

Wake up!  
It's time for you to wake up  
Wake up!  
To all the power you got  
Wake up!  
It's time for you to wake up  
You and I are so much more than our history

You can blame it on your mama, you can blame on faith  
You can blame it on unjustness, it might even be the case  
But honey, keep running, you're on the right track  
You'll never find the beauty if you're always looking back  
Life's expanding and growing if you follow that flow  
So get rid of that old skin you're about to outgrow  
It's a constant upgrading with the power now to choose  
Get fiercer and fiercer and level up with every move

Wake up!  
It's time for you to wake up  
Wake up!  
To all the power you got  
Wake up!  
It's time for you to wake up  
You and I are so much more than our history

Maybe it's not marriage, maybe it's love (I still love you)  
Whatever it is, pray that it never hits you  
I've got a feeling love don't have to be the way you say it is  
Well, it's gotta be that way with me (I still love you)  
But I've only loved one man  
And I've got a hunch I'm never going to feel no other kind of love  
When you were playing that record what were you thinking?  
No (I still love you)  
Well what are you gonna do about it?  
(I still love you)  
(I still love you)  
(I, I, I still love you)

Wake up!  
It's time for you to wake up  
Wake up!  
To all the power you got  
Wake up!  
It's time for you to wake up  
You and I are so much more than our history

Wake up!  
It's time for you to wake up  
Wake up!  
To all the power you got  
Wake up!  
It's time for you to wake up  
You and I are so much more than our history
