## **Test Of Time**

**Agnostic Front** 

Don't live in the past There's so much that lies ahead It's moving so fast Don't fall behind or you will crash So live for today But learn from the past And cherish the moment Live life - live fast!

Tomorrow - will never be like yesterday Today - We stand the test of time

Into the future, the more and more we grow - The test of time
This is not about yesterday, it's the ground that now you hold
- The test of time
Living in the past, you're gonna fall behind - The test of time
We're moving forward, we won't get left behind - The test of ti
me

So you're in denial You never cared so stop your lies And fuck what you done You lost the drive and your passion Still holding on You haven't done nothing since then You're not fooling no one Can't obtain what you begun

[Pre-chorus & Chorus]

The test of time (3x)
