

## Ejector Seat

## Agoraphobic Nosebleed

Shooting radioactive materials into the bloodstream  
Hitting my brain like a hammer  
Knocking me to the ground  
With every step I take  
I must get aboard that plane  
50 thousand feet  
The controls just went haywire  
Just stay calm  
Stay in your seats  
Skull starting to cave in  
Nose starting to bleed  
Just try and stay calm  
As you're torn from your seat  
Travel the friendly skies  
Improvised radioactive device  
Emergency landing  
Middle of nowhere in the middle of the night  
A suburb somewhere within the united states  
That in just 5 years will have tripled it's cancer rate
