

Don't need HD, got G-O-D  
Q, R, X, Y, E, Z  
Don't need HD, you got G-O-D  
Don't need HD, you got G-O-D  
Don't need  
Cool

I'ma put my dreams over you  
I wouldn't get too comfortable  
Everybody's talking like we cool  
I turn around like "Wait, who are you?"  
Imagine all the things I could do  
You say I'm selfish but so are you  
So don't compare me to these other dudes  
I'm the only one like three minus two  
I'ma put my dreams over you  
I don't want to get too comfortable  
Everybody's talking like we cool  
I turn around like "Wait, who are you?"  
Imagine all the things I could do  
You say I'm selfish but so are you  
So don't compare me to these other dudes

I know how to smile when I lose  
I know how to frown to say it's cool  
I could turn a "no" to "possibly"  
Have you doing things that you say you'd never do  
They trying to put a hole up in my ball  
They mad because they can't block me when I shoot  
I understand that I can't catch them all  
But I'm gonna shock the world like Pikachu  
I know how to make their bodies move  
Got to make them feel it when they groove  
People always dying for attention  
They only come around to kill the mood  
They not really down for the youth  
They just want to sound like they cool  
(They gonna monitor your every move)  
Just to watch you drown in the pool

I'ma put my dreams over you  
I wouldn't get too comfortable  
Everybody's talking like we cool  
I turn around like "Wait, who are you?"  
Imagine all the things I could do  
You say I'm selfish but so are you  
So don't compare me to these other dudes

I know how to play like a fool  
But I'm the smartest thing in the room  
Ain't nobody teach me my position  
And you will never find a substitute  
Don't hate on the man that's coming under you  
I know the truth make you feel uncomfortable  
I wish I could make my homies bulletproof  
Y'all hate on us more than Uncle Ruckus do  
Every beat that I make is edible  
I don't care 'bout standing on your pedestal  
God is blessing me, I don't believe in luck  
So what's a clover to a clever dude?  
I study so I can be ahead of you  
Got signatures all over my schedule  
I hope they don't try to take my jet fuel  
My favorite pair of shoes but no parachute

I'ma put my dreams over you  
I wouldn't get too comfortable  
Everybody's talking like we cool  
I turn around like "Wait, who are you?"  
Imagine all the things I could do

I know that they don't want to hear another trap song, again  
I know that they don't want to hear another rap song, again, again  
I bet a hundred million dollars make it last long  
I bet it last long

I have to compete  
I have to pack the bags under my eyes from getting no sleep  
Trying to save my whole team  
You know we riding four deep (wait, 1, 2, 3, 4, 5)  
I'm tripping Beemo up in the middle of the backseat  
I can only see the black sheep, I'm sick of all the white ones  
I ain't racist but I'm more concerned about Bo Bo and not Bo Peep  
Woody probably hate me but, ain't no fighting here  
I got a buzz bigger than Buzz Lightyear  
And y'all really don't know me  
I hope you really love me  
I hope you really mean it  
I hope your heart is big enough to pump blood for this anemic  
I hope you don't change the way you feel forget the anesthesia  
Me and you together gon' birth a new era to keep us breathing  
To stop the heathens from scheming  
Tell the kids to keep on dreaming  
Teamwork makes the dream work so honestly I never cheated  
I'm grade A and I'm not repeating  
And that's word to Mr. Feeny after class call Big Dog he guaranteed to have  
us all leaning  
Fresh off the block and it's hot that means we all steaming  
Know a lot so we glow a lot that means we all gleaming  
I told them it won't make you happy I guess they didn't believe me  
I tried to use a gun but bullets still don't work on demons  
We still try to go hunting figure we make the most of it  
In my mind I know I was letting my dad down like Gohan  
But coincidentally I wrote some hits there was no button  
Now everybody got their hand out like let me hold something
