

## Five Butterflies

AHI

Remember when we used to share  
The bachelorette just off St. Clair  
Freshly out your mother's house  
Never thought we'd make it out of there  
We'd make it out of there

Laying on that futon bed  
Dwelling on the words you said  
As long as we're under a roof  
I'd rather be right here with you instead  
Right here with you instead

Oh, my my, I saw five butterflies out the window  
Bathin' in light  
Like it's their first time alive  
Them five butterflies were dancin' like wind chimes by our window  
That light was pourin' inside  
And that's when I realized  
Oh girl, it won't be long  
Oh no, it won't be long  
No, it won't be long  
Oh girl, it won't be long

Streetcar was our choice chauffeur  
All on one time-based transfer  
Up and down the avenue  
In the aisle right next to you  
I swore  
Right next to you I swore

We know how to play by ear  
So give it just a couple years  
These tracks might lead us 'round and 'round  
Soon enough they'll take us out of here  
And we'll make it out of here

Oh, my my, I saw five butterflies  
Out the window  
Bathin' in light  
Like it's their first time alive  
Them five butterflies were dancin' like windchimes  
By our window  
That light was pourin' inside  
And that's when I realized  
Oh girl, it won't be long

If we, we start a family  
They'll see, how far we've come  
Then we, we can say finally  
I know, it won't be long

Oh my my, I saw five butterflies  
Out the window  
Bathin' in light  
Like it's their first time alive  
Them five butterflies were dancin' like windchimes  
By our window

That light was pourin' inside  
And that's when I realized  
Oh girl it won't be long  
No, it won't be long  
No, it won't be long  
Oh no it won't be long  
Oh girl it won't be long
