

Hush

AHI

It's indescribable
My eyes won't lie to you
I'll study your lips
Search through your heart
Yeah, that's what I would do

It's undefinable
Words are unreliable
I'll lay back and soak up your sweetness
That's what I would do

So hush
I'm here, lost in your soft touch
World on silence, it's just us
Feel that stillness, feel that rush
We don't have to say too much
Those three words will never be enough
'Cause I need you more than love
You're my life, you're the one
Let's feel this moment
So hush

It's sacred, and it's pure
I adore you as you are
It's Heaven right here when I'm with you
I need nothing more

So hush
I'm here, lost in your soft touch
World on silence, it's just us
Feel that stillness, feel that rush
We don't have to say too much
Those three words will never be enough
'Cause I need you more than love
You're my life, you're the one
Let's feel this moment

So hush
You leave me speechless
You leave me in awe
So hush
You've got me deep here in your delicate arms
So hush
You leave me speechless
You leave me in awe

So hush
I'm here, lost in your soft touch
World on silence, it's just us
Feel that stillness, feel that rush
We don't have to say too much
Those three words will never be enough
'Cause I need you more than love
You're my life, you're the one
Let's feel this moment
