

On Your Way

AHI

A river will end
And oceans begin
You're on your way
It's just like you said
I'll see you again
But you're on your way

The photograph you left in my hand
It reminds me we did the best that we can
And you're on your way
You're on your way
You're on your way

As far as you'll go
My door's never closed
I'm not far away
The road wanders off
And I'll watch you walk
'Cause you're on your way

The moment that you let go my hand
It reminded me life makes its own plans
And you're on your way
You're on your way
You're on your way

Oooh, I wanna see you in the good light
I wanna see you where the stars shine
I wanna see you as the wind takes all your dreams
And carries you away

The photograph you left in my hand
It reminds me we did the best that we can
And you're on your way
You're on your way
And you're on your way
You're on your way
You're on your...
You're on your way

A river will end
And oceans begin
You're on your way
