

# Anybody Got A Light?

Air Traffic Controller

Anybody got a light?

The day to day the song remains the same  
We hope we pray we get back to the way it was  
We never really had a chance to say goodbye  
Just letting go and trying to hold your head up high

Anybody got a light?

Do me a favor would you shine it over here  
Like animals we're scared of all that's changing  
You'll see this face when everything is safe again

There's nothing underneath you where you stand  
You're upside down and dropping all the plans you made  
The wind has cleared a path but left you colder  
There's something beautiful in starting over right?

Anybody got a light?

Do me a favor would you shine it this way  
I'm trying to find a reason to believe again  
Has anybody seen that part of me out there?

They promised it won't hurt a bit  
We'll bounce back like we do  
We're all backflipping forward toward the new

They say your day to day's about to change  
You hoped, you prayed we'd get back to the way it was  
By now somehow you found a way to say goodbye  
Just letting go and trying to hold that head up high

Anybody got a light?

Do me a favor would you shine it this way  
Anybody got a light?  
Do me a favor would you shine it over here  
Anybody got a light?  
Like animals we're scared of all that's changing  
Anybody got a light?  
You'll see this face when everything is safe again  
Anybody got a light?  
I'm trying find a reason to believe  
Anybody got a light?  
Has anybody see that part of me?  
Anybody got a light?
