

Live In

Air Traffic Controller

All we can do is live in
What time we're given
Only so much to spend
All we can do is live in
What time we're given
Before you reach the end

Each day
Could be a go to the beach day
Eat the juiciest peach day
Whatever makes you smile
Some days
Can be go go go days
But don't you think that it's okay
When it's worth your while

All we can do is live in
What time we're given
And no one really knows
All we can do is live in
What time we're given
How much is left to go

Childhood
Not everybody had it so good
If we could do it over some would
How far would you go
And who would you be
You couldn't choose another family
But all your friends and your surroundings
Are under your control

All we can do is live in
What time we're given
Go ahead and let them know
All we can do is live in
What time we're given
How much you love them so

Violence
Getting tired of the mindless
Those who never had the guidance
They are the most afraid
There is evil
Around defenseless people
Now the gentle and the feeble
Can never find their way

Stunted
At a job you never wanted
Every now and then you're haunted
Makes you want to cry
If you hadn't been grounded
You could've failed until you found it
And then finally amounted
To someone you like

We all die
We hardly ever get to say bye
Become an angel in the big sky
If you paid your dues
Wish I knew when it was coming
If there was some kind of warning
We would only do what's important
With the ones we choose

All we can do is live in
What time we're given
Not everyone survives
All we can do is live in
What time we're given
Go on you're still alive

All we can do is live in
What time we're given
Only so much to spend
All we can do is live in
What time we're given
Before you reach the end
