

## Empty Space

## Air Traffic

It's a void that I can't fill  
An empty space, I can't replace  
With anything at all

The lights are all burnt out  
And smoke will drive the swimmers down  
There's no one left at all

You've done enough, he's still alive  
He's breathing on his own  
I leave everything I have

You've done enough, he's still alive  
And he's breathing on his own  
And he's breathing on his own

There's chaos everywhere  
And panic written on the air  
That everyone is breathing

And crushing light of day  
The pain will never wash away  
The fear will never leave

You've done enough, he's still alive  
And he's breathing on his own  
I leave everything I have

You've done enough, he's still alive  
And he's breathing on his own  
And he's breathing on his own

And God save our souls  
How tables have turned and broke

One more like this could be the end  
They say they told us all along  
But we were busy getting laid

One more like this will be the end  
And we've known it all along  
We've known it all along
