

## Invertebrate

Airship

I'm just a dumb kid and I don't know my own mind  
So easily led, so just pull out my spine  
I'm just a loose limb another needle stuck in the stack  
No defining features academic I was not

And I do want to know why I can't feel my bones

I'm not Scorpio but I came with my tail held high  
Not trouble making just leave me here to die  
And I shake in my bones because I can't stand the petty little  
lies  
A pathetic race I wish that I could cut all ties

And I do want to know why I can't feel my pulse  
Did I try too hard to solve my own love
