

Navy Blues

Aisha Badru

You kicked me down
I got back up now
The scars aware are fading
You came around
Just to mess up now
I see right through your game
Your pretentious love brigade

You only came in the night
I didn't realize you had your armour on
You had your armour on
I had none
But when you came with the light
You were just in time
I had no one
Like a world with no sun
You were the only one

You had nothing to lose
And something to prove
Shook me till I was navy blue
Sure as I shined you unveiled your disguise
Now I'm here left and navy blue

Was it your intent to be the last man standing
Now I see why you took me high
You just flew me up to practice a crash landing
I fell right on my face
Your infectious love charade

You only came in the night
I didn't realize you had your armour on
Strapped with a loaded gun
I was dumb
But when you came with the light
You were just in time
I had no one
And my heart was open
You were the only one

You had nothing to lose
And something to prove
Shook me till I was navy blue
Sure as I shined you unveiled your disguise
Now I'm here left and navy blue
You kicked me down I got back up now
The skies were fading
