

One On One

AJ Mitchell

A day, a week, a night, no matter how long
I'll be right there, no matter how far
'Cause you're my favorite, I put no one above ya
Love this is crazy

The way you look at me, like nobody else
To say the least- I'm under your spell
And I can't help it, I wanna talk about it
This might sound crazy

I think you're the one, reflection is showing
Two one on one, tell me where we're going
I think you're the one, I want you to hold me
This world id do cold and I need some warming
I think you're the one, reflection is showing
Two one on one, tell me where we're going

I think you're the one, I think you're the one
I think you're the one

They say true love is fake, but somehow I know
It's more than great, the deeper you go
Try to explain it, you can't talk about it
Those words weren't made yet

The way you look at me, like nobody else
To say the least- I'm under your spell
And I can't help it, I wanna talk about it
This might sound crazy

I think you're the one, reflection is showing
Two one on one, tell me where we're going
I think you're the one, I want you to hold me
This world id do cold and I need some warming
I think you're the one, reflection is showing
Two one on one, tell me where we're going

I think you're the one, I think you're the one
I think you're the one

Ready right now, yeah I'm coming my babe
I'ma hit you on ya phone, on ya cellular

I'm ready right now, yeah I'm coming my babe
I'ma hit you on ya phone when I'm pullin' up
