Was it all in my head?
In an empty bed
And I told you that I need you baby
Can't you see I'm alone oh oh?
I was lost in my feet
On an empty street
So I said you seemed infinity
You forever figures 5 and 3
You know oh oh

Cross my heart and hope to die Stick a needle in my eye My momma says to pick the best And you are it

Hey
All our trouble's gone
Like when we were young
Take me back to where we all began
Here we are again like we should've been
Oh my lady can I have this dance?
My lady
Hey
All our troubles gone

Take me back to where we all began

Was it hard to believe?
Wear your heart on my sleeve
And I'll hold you when you're lonely
When you're cold cause you're the only girl for me

Cross my heart and hope to die Since you came into my life My momma says to pick the best And you are it

Like when we were young

Неу

All our trouble's gone
Like when we were young
Take me back to where we all began
Here we are again like we should've been
Oh my lady can I have this dance?
My lady
Hey
All our troubles gone
Like when we were young
Take me back to where we all began

Take you dancing in the park
Stroll the westside after dark
You are shining, you're an angel
When these words are set on a paper
You will never be a stranger now

Hey All our trouble's gone

Like when we were young
Take me back to where we all began
Here we are again, like we should've been
Oh my lady can I have this dance?
Hey
All our trouble's gone
Like when we were young
Take me back to where we all began
Here we are again, like we should've been
Oh my lady can I have this dance?
Hey
All our troubles gone
Like when we were young
Take me back to where we all began

Cross my heart and hope to die Since you came into my life My momma says to pick the best And you are it
