

# Without You

Akcent

Please don't leave me now  
Please don't leave me now

I'm lost now without you  
So without you, my love  
Just dust all around me  
Please surround me, don't go

Feels empty when you're not here  
You've vanished at every tear  
Nobody knows, why do I fear?  
Impossible now to find  
You're drowning in my mind  
Forbidden fruit, why do I feel?

Please don't leave me now  
Please don't leave me now

It's late now or never  
Seems forever, my love  
Just come here around me  
And surround me, don't go

Feels empty when you're not here  
You've vanished at every tear  
Nobody knows, why do I fear?  
Impossible now to find  
You're drowning in my mind  
Forbidden fruit, why do I feel?

Please don't leave me now  
Please don't leave me now

Please don't leave me now  
Please don't leave me now  
Please don't leave me now
