Here or there, there's no place for me
We're close yet so far apart
Everyone tells me I changed
When in my eyes, they're the ones who changed

The more I know about this world
The farther away I wanna get away from it
But then I can't escape from it either
Feels like I've seen something that tried to hide

Me, the world, people, love

I would revolve revolve around the vicinity
I would wander wander around the vicinity
I would try to plunge what's stuck inside of me
So I would go outside
But the only thing that greets me is the cold night air
It revolves revolves around me

No one is nodding at my words
Is it so hard to smile?
Everyone says I'm like an alien
I'd understand if it was true

The more I know about this world
The farther away I wanna get away from it
But then I can't escape from it either
Feels like I've seen something that tried to hide
Me, the world, people, love

I would revolve revolve around the vicinity
I would wander wander around the vicinity
I would try to plunge what's stuck inside of me
So I would go outside
But the only thing that greets me is the cold night air
It revolves revolves around me

Seeing the world after leaving home is so different
Someone else is reflected in the mirror
A child who cannot be loved
Or am I misunderstanding?
Father I can do it by myself now
Do you understand? You said 'I do'
But I'm still staying around
Only I am far apart, Am I Desperado

I would revolve around the vicinity
Then I grabbed the handle
And wrestled with the direction
I'm still too weak
I would wander around the vicinity
The place to reach you that island
The tip of my finger that points
Looks so lonely

I would revolve revolve around the vicinity
I would wander wander around the vicinity
I would try to plunge what's stuck inside of me
So I would go outside
But the only thing that greets me is the cold night air
It revolves revolves around me
