

Hey Moon

ALA.NI

Hey moon
Hey moon
How you looking so
Got my heart aglow
Oh you're so inviting
Hey moon
Hey moon
I will dance for you
I will sing to you
A kind of romancing

You can never go
I shall always stay
Even when the clouds
They hide you away
You're a superstar
In so many ways
Even when it's dark, you guide the way
I know when you're new
I know when you're full
Either way, your light is getting through
Never knew a light so bright at night
You never say no

Hey moon
Hey moon
Waning crescent moon
I can still see you
Even when you're hiding
I'll wait patiently
So that I can see
All that you behold
Shining bright and bold
I'll reach out and touch
Pray to skies above
Hoping that some day you'll grant me love
Beaming to your heart
There is only you
Loyally you're always coming soon
Never knew a light so bright at night
You never say no

Hey moon! Hey moon! Hey moon! ah
Hey moon! Hey moon! Hey moon! ah
Sometimes pink or blue
Oh you're so cute
And you're so exciting
Luminate the night
Silvery and white
Teeny shimmer stars
Gather in delight
Morning will come soon
Take my solitude
You're a friend the lonesome do talk to
Will you be my love
Twinkly and bliss
Before you go, please seal it with a kiss

Never knew a light so bright
You never say no
