

# Diagnosis

Alanis Morissette

Call it what you want  
Cuz I don't even care anymore  
Call me what you need to  
To make yourself comfortable

I've not left the house in a while  
I've not felt a glimpse of ease  
And I have not made much headway  
Since I have come back from the war

And I no longer give a damn  
Bout things that used to matter  
And I am covering my eyes  
As I am frozen on the spot

Call it what you want  
Cuz I don't even care anymore  
Call me what you need to  
To make yourself comfortable

So I am debilitated  
I can't remember where the sentence started when I'm trying to finish it  
And all of you are so frustrated  
And everyone around me is trying to help as much as they can

My house is spotless, my lens is  
Skewed, my limbs they recoil  
And I'm folding in on myself  
Since I am out of order

Call it what you want  
Cuz I don't even care anymore  
Call me what you want to  
To make yourself comfortable

So I am debilitated  
I can't remember where the sentence started when I'm trying to finish it  
And all of you are so frustrated  
And everyone around me is trying to help as much as they can

But I'm alone in this meltdown  
Of nervousness diagnosis

Call it what you want  
Cuz I don't even care anymore  
Call me what you need to  
To make yourself comfortable

So I am debilitated  
I can't remember where the sentence started when I'm trying to finish it  
And all of you are so frustrated  
And everyone around me is trying to help as much as they can

Call it what you want  
Call me what you need to  
To feel comfortable
