## **It Passes Always**

Nature allows nothing but herself It's why we're placed between her motions To build and thrive like material gods The stubborn fixtures that she always removes see to believe, so many to breathe Pleasing selves create to occupy One look would be a step inside me I am a constant in the ever's change As I dream I see when other's seem It passes always Underneath the outermost skies The one who seeks, the one who finds It passes always

[solo - Evans]

One look would be a step inside me I am a constant in the ever's change As I dream I see when other's seem It passes always Tidal, the wave that gives memory Underneath the outermost skies Spoken thoughts that circle me The one who seeks, the one who finds It passes always

[solo - Young]

Out from below down through Our rings of smoke A concrete mass emerges as one Its resedence points towards an end As it passes always a change will carry on
