

fall at the same time

aldn

You're not who I thought you'd be
You always get angry
But maybe it's me
Maybe it's you and I

We collide like star signs
Stuck inside the same lines, like, every night
Can't, can't try to make this be all right
You and I, we fall at the same time

Make me feel like shit, just a little bit
Hate to feel like this when I'm all on my own
You call me, I say sorry
We replay this tired-out story

Might not be the best of me
But this is the rest of me
Why can't I go free?
When it's really just you and I

We collide like star signs
Stuck inside the same lines, like, every night
Can't, can't try to make this be all right
You and I, we fall at the same time

Make me feel like shit, just a little bit
Hate to feel like this when I'm all on my own
You call me, I say sorry
We replay this tired-out story
I call you a bitch 'cause I'm sick of it
You call me a dick, then I hang up the phone
You call me, I say sorry
We replay this tired-out story
Make me feel like shit, just a little bit
Hate to feel like this when I'm all on my own
You call me, I say sorry
We replay this tired-out story
I call you a bitch 'cause I'm sick of it
You call me a dick, then I hang up the phone
You call me, I say sorry
We replay this tired-out story
