

watch me

aldn

Every night it's another problem
Toss n turn thinking how to solve them
Don't get too close to me
Keeping me from falling asleep
I don't really mean to dig too deep
Think it's time to set me free
So
Watch me watch me
Forget that you were in my life
Leave leave
Leave me here you left me to die
So much pressure
Nothing better
Three love letters
Damn my head hurts
It's always he said she said fuck you
I never even cared about the shit you do
It was said n done I got to see a new POV
True colors show after you let the light thru
Skip town see ya around idk you
Love to hate me like I never knew
Cause you know it's true

And better off alone
Picking up the pieces as I go along
Now I'm getting second thoughts maybe I was wrong I was wrong
No
Such hypocrite
The way you make up this bullshit
Cause it never had to with sentiment
Yea I see is jealousy
Get tf away from me
See ya later
I'm falling in love with strangers
Like it was never anything major
I'm done with it get away from me
So
Watch me watch me
Forget that you were in my life
Leave leave
Leave me here you left me to die
So much pressure
Nothing better
Three love letters
Damn my head hurts
So
Watch me watch me
Switch up need leave u in the past
Stuck in your daydream
Knew that this shit would never last
I'm skipping the line
I can't wait no more time
I'm bouta lose my mind
I'm bouta lose my mindddd
