

Bug On My Windshield

Alec Empire

rich you are but far from happy
I want to tell you to leave me alone
don't you see that I feel nothing?
discharge comes without warning
you're a bug on my windshield
I don't want to be with you
you're a bug on my windshield
I don't
you're a bug on my windshield
I don't want to be with you
you're a bug on my windshield
I just don't
I got no history
I want no past
I fight my war in the sun you know
salvation is coming
preach to me when I'm glad or alive
I got this thing in my mind
like suddenly I've remembered all this
except it's not my own memories
it feels like it's been shoved in my head from outside
nasty black water leaking
nasty black water leaking
you're a bug on my windshield
I don't want to be with you
you're a bug on my windshield
I don't
you're a bug on my windshield
I don't want to be with you
you're a bug on my windshield
I just don't
