

## More to Life

Alex Day

To the world, we are cracks in the streetlight  
Clinging on, giving love as we pass by  
Burning candles in the breeze  
That is why you would jump out the window  
Breathing in, taking in every moment  
That's why you are beautiful to me

I could live my life with you  
And never scratch the surface of the list of all the things we  
want to do  
You are always telling me there's more to life than this  
But I don't know if there is more to life than you

Life is short and I know, I don't doubt it  
But I find that when I think about it  
Life's the longest thing we do  
And what is life but another adventure  
What is love if you don't wanna share it  
So fuck the rules, they'll all be gone too soon

I could live my life with you  
And never scratch the surface of the list of all the things we  
want to do  
You are always telling me there's more to life than this  
But I don't know if there is more to life than you

I could live my life with you  
And never scratch the surface of the list of all the things we  
want to do

I could live my life with you  
And never scratch the surface of the list of all the things we  
want to do  
You are always telling me there's more to life than this  
But I don't know if there is more to life than you  
I could live my life with you  
And never scratch the surface of the list of all the things we  
want to do  
You are always telling me there's more to life than this  
But I don't know if there is more to life than you  
But I don't know if there is more to life than you
