

Right Now

Alex G

Gave you my love, you gave me nothing
Said what I gave wasn't enough
You had me feeling I was foolish
Forever thinking this could be the one

I wasn't even in the running
Already had your mind made up
You left me searching for a reason
Why'd you leave, left me in the dust

And now you're saying that you need me babe
(Right now, right now)
And now you're saying that you need me babe
(Right now, right now)
And now you're saying that you love me, love me babe
(Right now, right now)
And now you're saying that you need.
Saying that you need.
Saying that you need me
(Right now)

Gave you my love, thought I could trust you
You let me down at every turn
You had me hanging on a dream you never believed
You gave me your word

Finally on the other side now
And I could see for miles
And I've forgotten every line

And now you're saying that you need me babe
(Right now, right now)
And now you're saying that you need me babe
(Right now, right now)
And now you're saying that you love me, love me babe
(Right now, right now)
And now you're saying that you need.
Saying that you need.
Saying that you need me
(Right now)

Did you think this would be easy?
Thought this would be easy
Not now, not now
I know you heard me through an open window
Whispers carried to your ear
Whispers sounded so clear

(Somehow it's so clear now...
Somehow it's so clear now...
What's that sound?
That's your fading... away)

And now you're saying that you need me babe
(Right now, right now)
And now you're saying that you need me babe
(Right now, right now)

And now you're saying that you love me, love me babe
(Right now, right now)
And now you're saying that you need.
Saying that you need.
Saying that you need me
(Right now)

And now you're saying that you need me babe
(Right now, right now)
And now you're saying that you need me babe
(Right now, right now)
And now you're saying that you love me, love me babe
(Right now, right now)
And now you're saying that you need.
Saying that you need.
Saying that you need me
(Right now)
(Right now, right now...)
