

## All I Want

Alex Gaudino

From where I stand  
I'm a long long way from you tonight  
But in my head  
In my heart you're standing right beside me

And I just can't let you go  
Tonight I could have anything

But all I want is your love  
All I want is your love  
All I need is your love  
All I want is your love  
All I need is your love  
All I need is your love  
All I want is your love

Your love (x4)  
All I want is your love  
All I want is your love

Your fire is cold  
Still a burning red for you and I  
Give you my soul  
And I need you right here beside me

And I just can't let you go  
Tonight I could have anything

But all I want is your love  
All I want is your love  
All I need is your love  
All I want is your love  
All I need is your love  
All I need is your love  
All I want is your love
