

La Brea

Alex Isley

Believe believe believe believe believe
Believe believe believe believe believe

I see pretty lights in the distance
I can be underneath them in an instance
I know, The road is gonna take me
No I won't fall but if I did nothing could break me
Don't let fear get in front of you
Know just where you wanna go (know)
Know in your heart you'll arrive
Whatever is ahead of you there is something that you should know
You're in for such a beautiful ride
And so I...

Believe believe believe believe believe
Believe believe believe believe believe

Look how far you've come, from where you came from
Look at where you're going (going)

Look how far you've come, from where you came from
Look at where you're going (going)

Gold skies of a hill and a highway, my time
Thinkin' about the future, going my way I've learned
Ain't no use in pretending
So I'll give my all
And I'll always know the place of my beginning
Don't let doubt get in front of you
Know just where you wanna be (wanna be)
Know in your heart you'll arrive
Just when you think you know enough
You've got so much to see
You're in for such a beautiful ride
And so I

Believe believe believe believe believe
Believe believe believe believe believe

Look how far you've come, from where you came from
Look at where you're going (going)

Look how far you've come, from where you came from
Look at where you're going (going)

The Possibilities of what you can be will never end
So just begin (begin)
The Possibilities of what you will be will never end
So just begin (begin)

Won't you Look how far you've come, from where you came from
Look at where you're going (going)
Look how far you've come from where you started from
Look at you where you're going (going)
