

# You Don't Think You Like People Like Me

Alex Lahey

All I want is to have cleanskin wine and watch Mulholland Drive  
with you  
But in the morning, through your sleepy eyes, you tell me that  
I'm not for you  
It's not that easy when there's nothing wrong while everything  
has fallen through  
You say it's not to do with me but I really wanna know the truth

If you can't help it, then why doesn't this count?  
You're staying over long after my lights go out  
It's taken so long for you to figure out  
If it's serious, then what's it really all about?

You don't think you like people like me  
I know I've heard this one before  
Maybe I'm the one exception that can last forever  
But that can only happen if you let us be together  
You don't think you like people like me

You come on over just to leave me here exactly where I was before  
If you're in two minds, you know mine's a third, there isn't room for any more  
The conversation goes around and around and around, it's all been said before  
Like a tornado when it loses speed, these words are gonna hit the floor

If you can't help it, then why doesn't this count?  
You're staying over long after my lights go out

You don't think you like people like me  
I know I've heard this one before  
Maybe I'm the one exception that can last forever  
But that can only happen if you let us be together  
You don't think you like people like me

What's that look on your tired face, honey?  
I'm getting tired, don't find this funny  
Can we pick it up from where we started?  
Even if it leaves me broken-hearted  
What's that look on your tired face, honey?  
I'm getting tired, don't find this funny  
You and I  
You and I

You don't think you like people like me

I know I've heard this one before  
Maybe I'm the one exception that can last forever  
But that can only happen if you let us be together  
You don't think you like people like me
