

Anything

Alex Mattson

Summer time, getting high
On the small town streets
We were young, got it wrong
So we'd never leave

We were blinded by those big city lights
But I'll drive all night to be there by your side
Body to body in slow motion
I got my eyes wide open
Take the time in this moment
With you (With you)

So, don't look down
I will give you anything
Second time around
I will give you anything

We can go up high, high, higher
We can go up high, high, high
So don't look down
I will give you anything
Yeah, anything

Older now, in the town
Where it all began
When you smile
It reminds me of a life we planned
Now I'm blinded by the green of your eyes
So, I'll get it right
The, the second time

Body to body in slow motion
I got my eyes wide open
Take the time in this moment
With you (With you)

Nobody, nobody, it's golden
Making me feel like I'm rolling
Leaving the world in this moment with you

So, don't look down
I will give you anything
Second time around
I will give you anything

We can go up high, high, higher
We can go up high, high, high
So, don't look down
I will give you anything
You anything

Body to body in slow motion
I got my eyes wide open
Take the time in this moment
With you, you, you, yeah

So, don't look down

I will give you anything
Our second time around
Oh, I will give you anything
We can go up high, high, higher
We can go up high, high, high
So, don't look down
I will give you anything
Yeah, anything
