

I See Light (Interlude)

Alex Vargas

I see a light
Shining through your broken bones
Captured in a hell you know
But trying to look around

Like a sun
Everything's eclipsing you
The planets never stop for you
They only pass you by

Lonesome living, keeps you clear
Ever skipping, never too near
But in your hurry, I still see you there

In your eyes I see a light
In your eyes I see a light
In your eyes I see a light, oh
