

Replicate You

Alexa Cappelli

We were in the back of your car
Lookin' up at the stars, countin' the distance
We were tracin' lines in the dark
Like the scar on your arm, now what I'm missin'

Is your touch, your hand in my hand
Fell much harder than I'd planned
Different time zones, same quicksand
Try to get out, but I can't

If I'm gonna love somebody new
I gotta tell myself how much I hate you
If I'm gonna move on anytime soon
I got memories I should put a flame to
I dance with someone, try to fall just because, yeah
But I'm only ever thinking 'bout us
No matter who I'm holding on to
I'm always tryna replicate you

You, you

I've been lookin' out for your eyes
And every once in a while I think I see 'em
I keep fallin' for the mirage
In everyone that you're not, I keep dreamin'

Of your touch, your hand in my hand
Fell much harder than I'd planned
Different time zones, same quicksand
Try to get out, but I can't

If I'm gonna love somebody new
I gotta tell myself how much I hate you
If I'm gonna move on anytime soon
I got memories I should put a flame to
I dance with someone, try to fall just because, yeah
But I'm only ever thinking 'bout us
No matter who I'm holding on to
I'm always tryna replicate you

I'm always tryna replicate you
But I'm never gonna replicate

The way that it was and not the way that it is
Thought you would've come back by now, but you never did
Now the way that it was will just be never again
And I gotta learn how to forget

If I'm gonna love somebody new
I gotta tell myself how much I hate you
If I'm gonna move on anytime soon
I got memories I should put a flame to
I dance with someone, try to fall just because, yeah
But I'm only ever thinking 'bout us
No matter who I'm holding on to
I'm always tryna replicate you

Always tryna replicate you
Always tryna replicate you
But I'm never gonna replicate you
